

Career Services Assignment Week 2 – GitHub Profile Setup

Points possible: 50

Category	Criteria	% of Grade
Completeness	All requirements of the assignment are complete.	100

Instructions: Follow the steps below to set up your GitHub account profile. After watching the video, *Source Control with Git Overview*, you should have already set up a GitHub account for this program. If you have not setup your GitHub account, review the above video in Week 1's curriculum and set your account up before proceeding with this assignment.

1. GitHub should not be thought of as a resume or networking tool as much as it should be a place to showcase your work and code. To that end, having a GitHub profile that is personalized shows potential employers or clients that you care about your work.
2. Now that you are set up with GitHub, let's get your profile page ready to go!
3. First, upload a high-quality headshot to your profile page.
4. Next, update your profile to discuss what you do and what you are learning. You have to think about this one, because GitHub doesn't give you too many characters to accomplish this task.
5. Follow at least three (3) of your classmates, teachers, or any repository of interest to you.
6. Go to one of your repositories and update the **About** section to discuss what the purpose of the assignment is and tag the languages used like below:

7. Finally, add a link to your GitHub profile on your LinkedIn page.

Attach Screenshots of Your Finished GitHub Profile Below

The screenshot shows a web browser window with the URL `github.com/markmccreery`. The browser's address bar and tabs are visible at the top. The GitHub interface features a dark header with navigation links: `Pull requests`, `Issues`, `Marketplace`, and `Explore`. Below the header, the profile of **Mark McCreery** (`markmccreery`) is displayed. The profile includes a circular profile picture of a man in a suit, a bio stating "I am an aspiring software developer who is currently learning how to utilize javascript, html, and the works.", and an `Edit profile` button. To the right, the `Popular repositories` section lists five public repositories: `test-repo` (practice), `testRepository`, `Week1`, `Promineo` (All files related to coursework), and `FrontEndFolderTree` (Directory that includes all files that might be useful for the Promineo boot camp, with a JavaScript tag). The bottom of the profile shows `11 contributions in the last year` and a `Contribution settings` dropdown.
